Subject: RE: Answers to your questions on sampling in Dimock

Thanks,

I should have specified. I didn't mean for today, rather in the coming weeks or months.

It would probably be best to contact both of us. I will be leaving the office shortly and won't be back until Tuesday.

Thank you. Should I contact you or Terri with any future questions?

Peter -- Thus far, residents from 55 homes have agreed to sampling, and EPA is awaiting final responses from residents at 11 other homes that EPA would like to sample.

Thank you. Is there a total number of homes you expect to take samples at? Originally it sounded as though it might be between 50 and 60 possibly?

Subject: Answers to your questions on sampling in Dimock
Peter: Here are the answers to the questions you sent to Terri White:
Q: How many wells have been sampled to date?
ANSWER: By the end of the day today, EPA expects to have completed sampling at 11 homes.
Q: How often are the water deliveries?
ANSWER: Water deliveries continue to be daily until we get a better idea on how much water each home needs.

Q: Are we doing split sampling with PADEP and Cabot?

ANSWER: Yes, we are conducting split sampling with PADEP and Cabot as long as the residents agree to it. It is up to the residents to decide who they will allow on their property to conduct sampling.
